Projects

LPU NSS Management Website | PHP, Laravel, MySQL

Jan 2026 – Feb 2026

- Engineered a full-stack web application using **Laravel (PHP)** and **MySQL** to manage events, registrations, and attendance.
- Implemented **role-based authentication and authorization** with Google OAuth and secure session management.
- Designed core functionalities including **QR-based attendance, NSS hours tracking, and certificate generation**.
- Optimized **MySQL database schema** to improve data storage efficiency and query performance.
- Developed scalable admin features including **dashboard analytics, Excel export, and Razorpay integration**.
- Architected **REST APIs** and performed CRUD operations for efficient data handling.

Samarpan (Real-Time Blood Donor Platform) | Next.js, TypeScript, MongoDB

Aug 2025 - Jan 2026

- Created a real-time web application using Next.js, TypeScript, and MongoDB to connect blood donors and patients.
- Integrated JWT-based authentication and role-based access control for secure user and admin operations.
- Built REST APIs for blood request management and donation tracking, improving system scalability.
- Modern responsive UI using Tailwind CSS to enhance user experience across devices.
